Dynasty Gold Completes 3,000-Meter Drilling at Thundercloud in Ontario

VANCOUVER, British Columbia, October 7, 2026 -- Dynasty Gold Corp. (TSX.V: DYG) (FSE: D5G1) (OTC: DGDCF) ("Dynasty" or the "Company") is pleased to announce the completion of a 3,000m, fourteen-drillhole program at its 100%-owned Thundercloud Gold Project. The Thundercloud property is located 200km southeast of the gold mining hub of Red Lake and 47 km southeast of Dryden, in the Manitou-Stormy Lakes greenstone belt of Northwest Ontario.

The fourteen drillholes were completed during a July-to-September drill campaign. Six drill holes were drilled in the South-Pelham area, targeting induced polarization (IP) chargeability anomalies, which are typically indicative of sulfide, particularly pyrite, mineralization. The six diamond drillholes were spaced over an area 300m by 400m hosting IP anomalies and indications of potential gold-bearing mineralization. Eight holes were drilled at the Pelham Zone: three holes were designed to obtain mineralization samples for metallurgical testing required to further evaluate the potential for open-pit mining; two holes targeted possible easterly and down-plunge extensions of Pelham mineralization; one hole tested historically indicated surface mineralization to the north of the Pelham zone; and one hole tested an east-west trending IP chargeability anomaly east of the Pelham zone.

All drill core was logged and marked for sampling by the Company's technical adviser, Peter Holbek, or Director, Richard Redfern. Selected core for sampling was cut by diamond saw under technical supervision and delivered to the laboratory in Dryden for analysis. Assay results will be released when available. Depending on the assay results and weather conditions, the Company is planning additional drilling for the fall/winter season.

The technical content of this press release has been reviewed and approved by Peter Holbek, M.Sc., P.Geo, a "Qualified Person" ("QP") as defined in National Instrument 43-101 – Standards of Disclosure for Mineral Projects.

About Dynasty Gold Corp.

Dynasty Gold Corp. is a Canadian mineral exploration company currently focused on gold exploration in North America, with projects located in the Manitou-Stormy Lake greenstone belt
